1. Which one of the following statements about agile approaches to developing products is true?

    ○ They are incremental but not iterative.
    ● They are iterative and incremental.
    ○ They are iterative but not incremental.
    ○ They are not iterative and not incremental.

    `1 / 1 point`

    ✓ **Correct**
    This is covered in Agile Overview.

2. Which one of the following statements is true?

    ○ The scientific method does not apply to teams.
    ○ The scientific method usually does not involve iterations.
    ● The scientific method is similar to the "plan, do, check, act" method of improving business processes.

    `1 / 1 point`

    ✓ **Correct**
    This is covered in Agile Overview.

3. Which one of the following statements is true?

    ● In agile project management, planning is distributed throughout the life of the project.
    ○ Waterfall projects usually have shorter iterations than agile projects.
    ○ The feature batch size in waterfall project management is usually very small.

    `1 / 1 point`

    ✓ **Correct**
    This is covered in Agile Overview.

4. Which one of the following statements about Jira's hierarchy is true?

    ○ A Jira issue contains projects.
    ○ An application can contain only one project.
    ● An application contains projects, which contain issues.

    `1 / 1 point`

    ✓ **Correct**
    This is covered in Jira Overview.

5. Which one of the following statements about Jira projects is true?

    ○ Issues will automatically be created when creating a project.
    ○ Project templates are also called fields.
    ● A project template can be selected when creating a project.

    `1 / 1 point`

○ A project template can be selected when creating a project.

✓ **Correct**
This is covered in Jira Overview.

6. Which one of the following statements about Jira settings is true? `1 / 1 point`

○ A change to a setting always applies to all projects.

◉ The scope of what a setting applies to depends on which level of the Jira hierarchy that you are in.

○ A change to a setting always applies only to a specific project.

✓ **Correct**
This is covered in Jira Overview.

7. Why are there multiple columns in an agile board? `1 / 1 point`

○ One column for each work item.

◉ One column for each step that a work item goes through.

○ One column for each team member.

✓ **Correct**
This is covered in Visualizing Work- Boards.

8. On a board, what happens when you move an issue from one column to another? `1 / 1 point`

○ A new issue is created.

○ The issue's workflow changes.

◉ The value of the issue's "status" field changes.

✓ **Correct**
This is covered in Visualizing Work- Boards.

9. When you are adding a column to a board, what must be associated with the column? `1 / 1 point`

○ An issue.

◉ A status.

○ A workflow.

✓ **Correct**
This is covered in Visualizing Work- Boards.

10. Which one of the following statements about the kanban method is true? `1 / 1 point`

○ It is not related to agile.

○ You must create new team roles to implement kanban.

◉ A key principle is to limit work in progress.

✓ **Correct**
This is covered in Kanban Overview I.

11. When a kanban team member is ready to work on a new issue in the standard Jira kanban workflow, which one of the following is usually true? `1 / 1 point`

○ Any issue from the backlog is pulled to the "in progress" column.

○ The issue at the top of the "selected for development" column is pulled to the "in progress" column.

○ A planning meeting should be called.

✓ **Correct**
This is covered in Kanban Overview I.

12. Which one of the following statements about a kanban backlog is true?   `1 / 1 point`

○ It should not be changed.

○ It should only be changed during certain time windows.

⦿ It can be changed at any time.

✓ **Correct**
This is covered in Kanban Overview I..

13. Which one of the following statements about work in progress limits is true?   `1 / 1 point`

⦿ They help the team continuously improve.

○ They should be set for every status.

○ They slow down the flow of the process.

✓ **Correct**
This is covered in Kanban Overview II.

14. An airport deli provides two choices- you can buy a prepared sandwich from the refrigerator or you can order a sandwich   `1 / 1 point`
at the counter and have it prepared for you. From the perspective of preparing the sandwich, which uses a pull system?

⦿ The counter only.

○ The refrigerator only.

○ Both the refrigerator and the counter.

✓ **Correct**
This is covered in Kanban Overview II.

15. Which one of the following statements is true?   `1 / 1 point`

⦿ A cumulative flow diagram shows the number of issues in each status over time.

○ Cycle time is the time from issue creation to issue completion.

○ A cumulative flow diagram should ideally trend down over time.

✓ **Correct**
This is covered in Kanban Overview II.
